Power Transformer Chassis Mount: Single Secondary

## F-29U

## Electrical Specifications (@25C)

1. Maximum Power: 132VA
2. Primary: $115 \mathrm{~V} 50 / 60 \mathrm{~Hz}$
3. Secondary: 12.0VCT or 11.0VCT or 10VCT @ 11.0 Amps*
4. Temperature Rise: 35C TYP (45C MAX allowed)

## Description:

The F-29U is part of a series which has a long history of reliable service in the field, made from a proven design and constructed with UL recognized materials.

## Construction:

Wound on a single channel nylon bobbin. Materials are UL recognized, Class B ( $130^{\circ} \mathrm{C}$ ) rated.

## Safety:

These products are $100 \%$ hipot tested with an insulation of 3000 V between primary and secondary windings as well as between the primary / secondary windings and the core.

| Dimensions: |  |  | Units: In inches |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| A | B | C | D | E |  |
| 4.125 | 3.50 | 3.375 | $2.75 \pm 0.30$ | $2.5 \pm 0.060$ |  |

Lead length: 7.0 inches $\pm 1$ inch
Weight: 6.5 lbs

## Schematic:

## Connections*:

A. Applying 115VAC across Black to Black/White will produce an output voltage of 12VCT at rated current
B. Applying 115VAC across Black to Black/Red will produce an output voltage of 11VCT at rated current
C. Applying 115VAC across Black to Black/Yellow will produce an output voltage of 10VCT at rated current

Only one primary connection should be made at any given time.
CT = Center tap. Measuring a voltage from the CT lead (GRN/YEL) to either Green leads will yield approximately half of the secondary voltage.

RoHS Compliance: As of manufacturing date February 2005, all standard products meet the requirements of 2002/95/EC, known as the RoHS initiative.
